

# Cruach Clenamachie Wind Farm

Viewpoint 1  
Barguillean

### Existing View

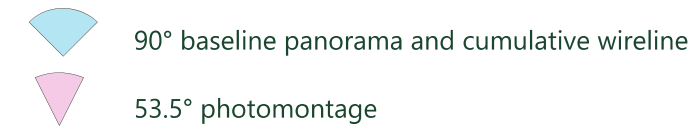

This minor road provides a view over a layered landscape of rolling ground as the road descends into Glen Lonan. Woodland covers the hills across most of the view with small areas of rough grassland or moorland visible in patches between the trees. Death Choimhead forms a notable summit and is seen to rise out of the woodland. Looking towards the Site, a house is visible in the midground of the views set amongst the trees, in other directions views are contained by rising ground.

### Predicted Change

Five of the proposed turbines would be partially screened behind the hills and woodland forming the skyline looking east. One of the proposed turbines would be more openly visible above the woodland and most of the tower would be visible. At night three of the proposed turbine lights would be visible.

### Cumulative

An Carr Dubh and Ladyfield Wind Farms would not be visible from this location.

# Cruach Clenamachie Wind Farm

## Viewpoint 2 Glen Lonan

### Existing View

This view is located on a minor road along the floor of Glen Lonan. The view is channelled along the wide valley in both directions, including towards Ben Cruachan to the east, with rugged hill sides covered in a mixture of coniferous woodland and grassland containing the views to either side. The base of the valley is covered in rough grassland with some small trees. A house is seen set within trees and tucked against the slopes of the glen.

### Predicted Change

Two turbines would be seen behind the forestry on the skyline above the valley side. The nearest turbine would be screened by the trees from just below the hub downwards and visibility of the rear turbine would be limited to blade tips only. At night one of the proposed turbine lights would be visible.

### Cumulative

An Carr Dubh and Ladyfield Wind Farms would not be visible from this location.

# Cruach Clenamachie Wind Farm

Viewpoint 3  
Barranrioch

### Existing View

This open view from a minor road looks across low rolling hills, covered by grassland and small clusters of deciduous trees, towards rugged, distant hills covered by grassland and coniferous woodland. The top of Ben Cruachan can be seen above the skyline. A small number of houses and outbuildings are seen adjacent to the road looking north. Small overhead lines are seen crossing the view in most directions, except looking east towards the Site.

### Predicted Change

All six turbines would be visible on the skyline beyond the smaller hills seen in the midground and in front of Ben Cruachan. Most of the turbines would be predominantly screened by the landform, with visibility limited to blades only. Two turbines would be more openly visible with the hub and part of the tower visible. At night two of the proposed turbine lights would be visible.

### Cumulative

An Carr Dubh and Ladyfield Wind Farms would not be visible from this location.

# Cruach Clenamacrie Wind Farm

Viewpoint 4  
Ardchnonnell

### Existing View

Looking towards the Site, the view looks from a minor road across a gently undulating hillside. There are trees and properties seen scattered across the hillside, with small overhead lines connecting the buildings. Ben Cruachan is seen above the nearby skyline. Visibility to north and west is limited by the topography which rises steeply behind the road, to the south there is a more open outlook and a house can be seen further along the road.

### Predicted Change

All six turbines would be visible behind the undulating hillside. The towers of four turbines would be mostly screened by the landform, with visibility limited to hubs and blades and another would be seen as blade tips. One turbine would be more openly visible seen beyond the summit of the hill. At night all five of the proposed turbine lights would be visible.

### Cumulative

An Carr Dubh and Ladyfield Wind Farms would not be visible from this location.

# Cruach Clenamacrie Wind Farm

Viewpoint 5  
A828 Connel Bridge

## Existing View

This panoramic view is located on Connel Bridge and the view towards the Site looks across the village of Connel on the south shore of Loch Etive to the rising mountains behind. Settlement is visible on both sides of the loch set amongst areas of woodland. Hills are seen to rise behind the houses and are larger and more rugged to the north, east and west. Looking south-east, towards the Site, the hills are lower and more rolling and the distant turbines at Beinn Ghlas Wind Farm are seen as a very minor feature behind the hills.

## Predicted Change

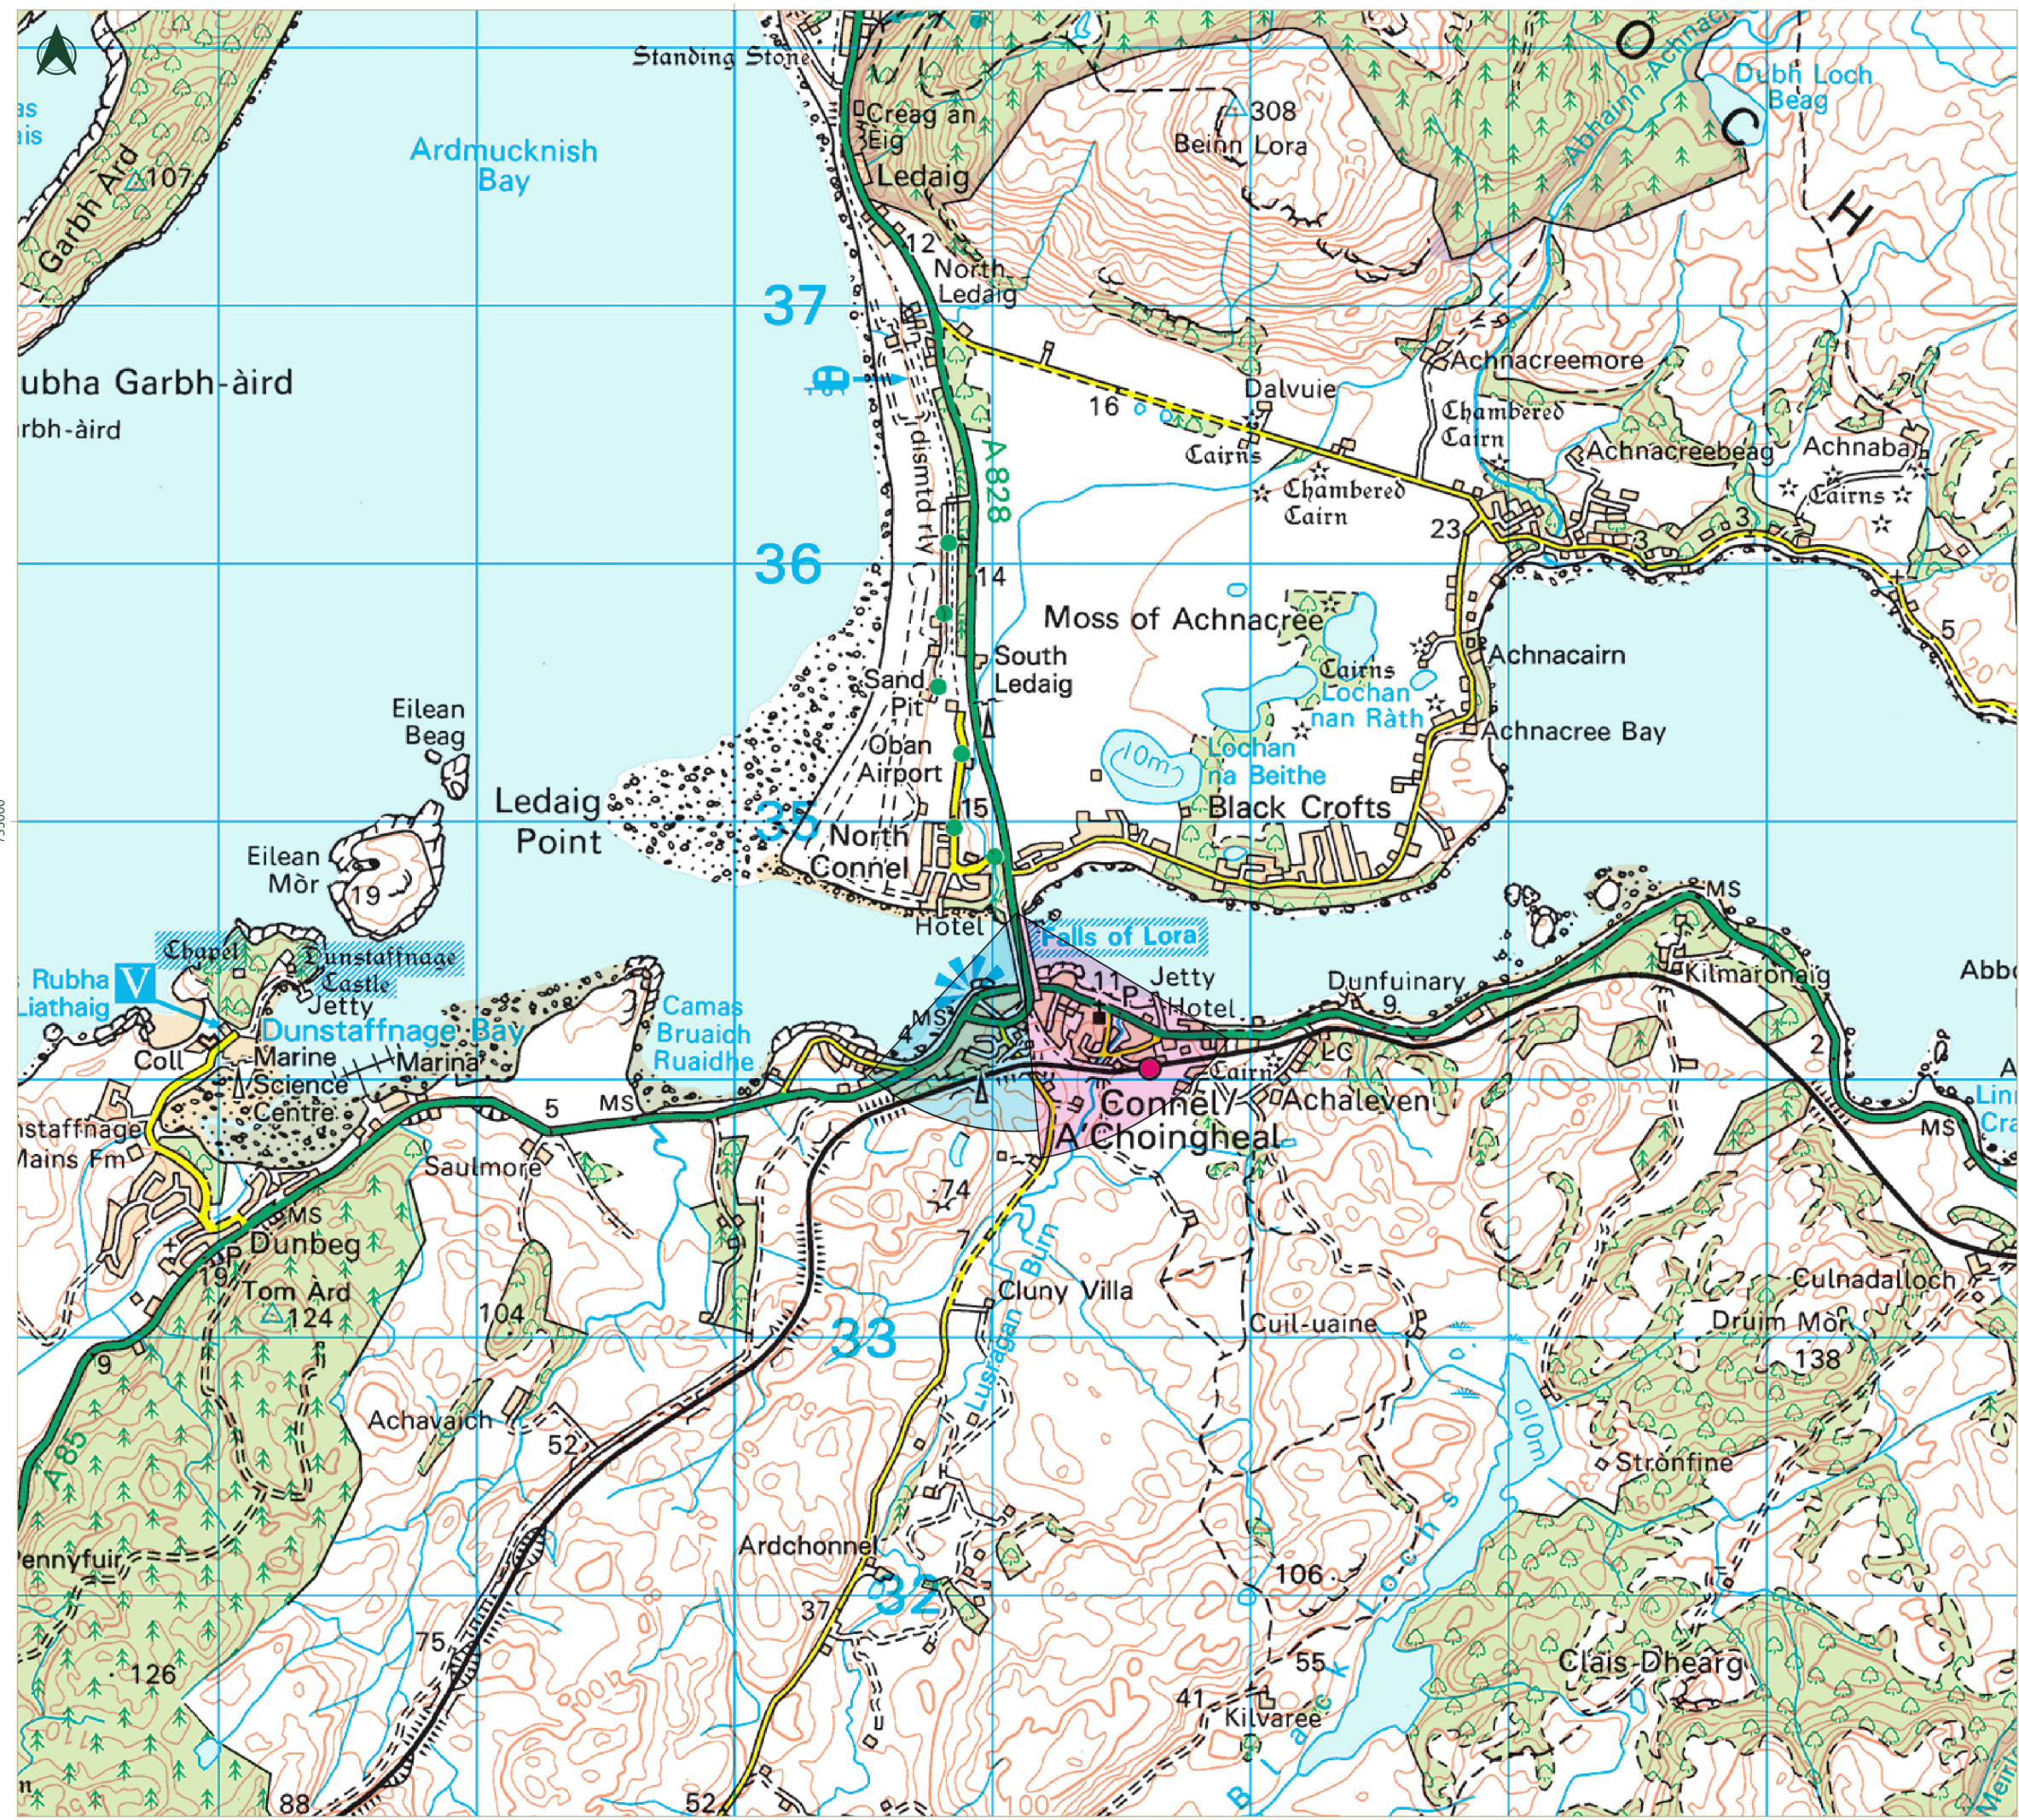

All six of the proposed turbines would be openly visible set among the hills beyond Connel. The turbines would appear as two groups, one of four turbines and one of two; they would appear markedly larger than the turbines at Beinn Ghlas due to their greater size and proximity. At night all five of the proposed turbine lights would be visible.

## Cumulative

An Carr Dubh and Ladyfield Wind Farms would not be visible from this location.
