

Cruach Clenamacrie Wind Farm

Viewpoint 6
Achnacree Bay

Existing View

The view towards the Site looks south from a minor settlement on the edge of Loch Etive across Achnacree Bay, towards layers of low rolling hills that are mostly covered in woodland. The turbines at Beinn Ghlas Wind Farm are seen as a small feature on the distant skyline. Views to east and west look along the shoreline towards a low horizon and settlement to the west, and to hills and mountains including Ben Cruachan to the east. Nearby houses, trees and rising ground curtail views northwards.

Predicted Change

The proposed turbines would be seen as three groups of two turbines set across the hills on the opposite side of the loch; they would appear markedly larger than the turbines at Beinn Ghlas due to their greater size and proximity and would occupy the focal point of this view where the eye is naturally drawn across the loch. The top of the substation may be visible if the trees which screen it are felled. At night all five of the proposed turbine lights would be visible.

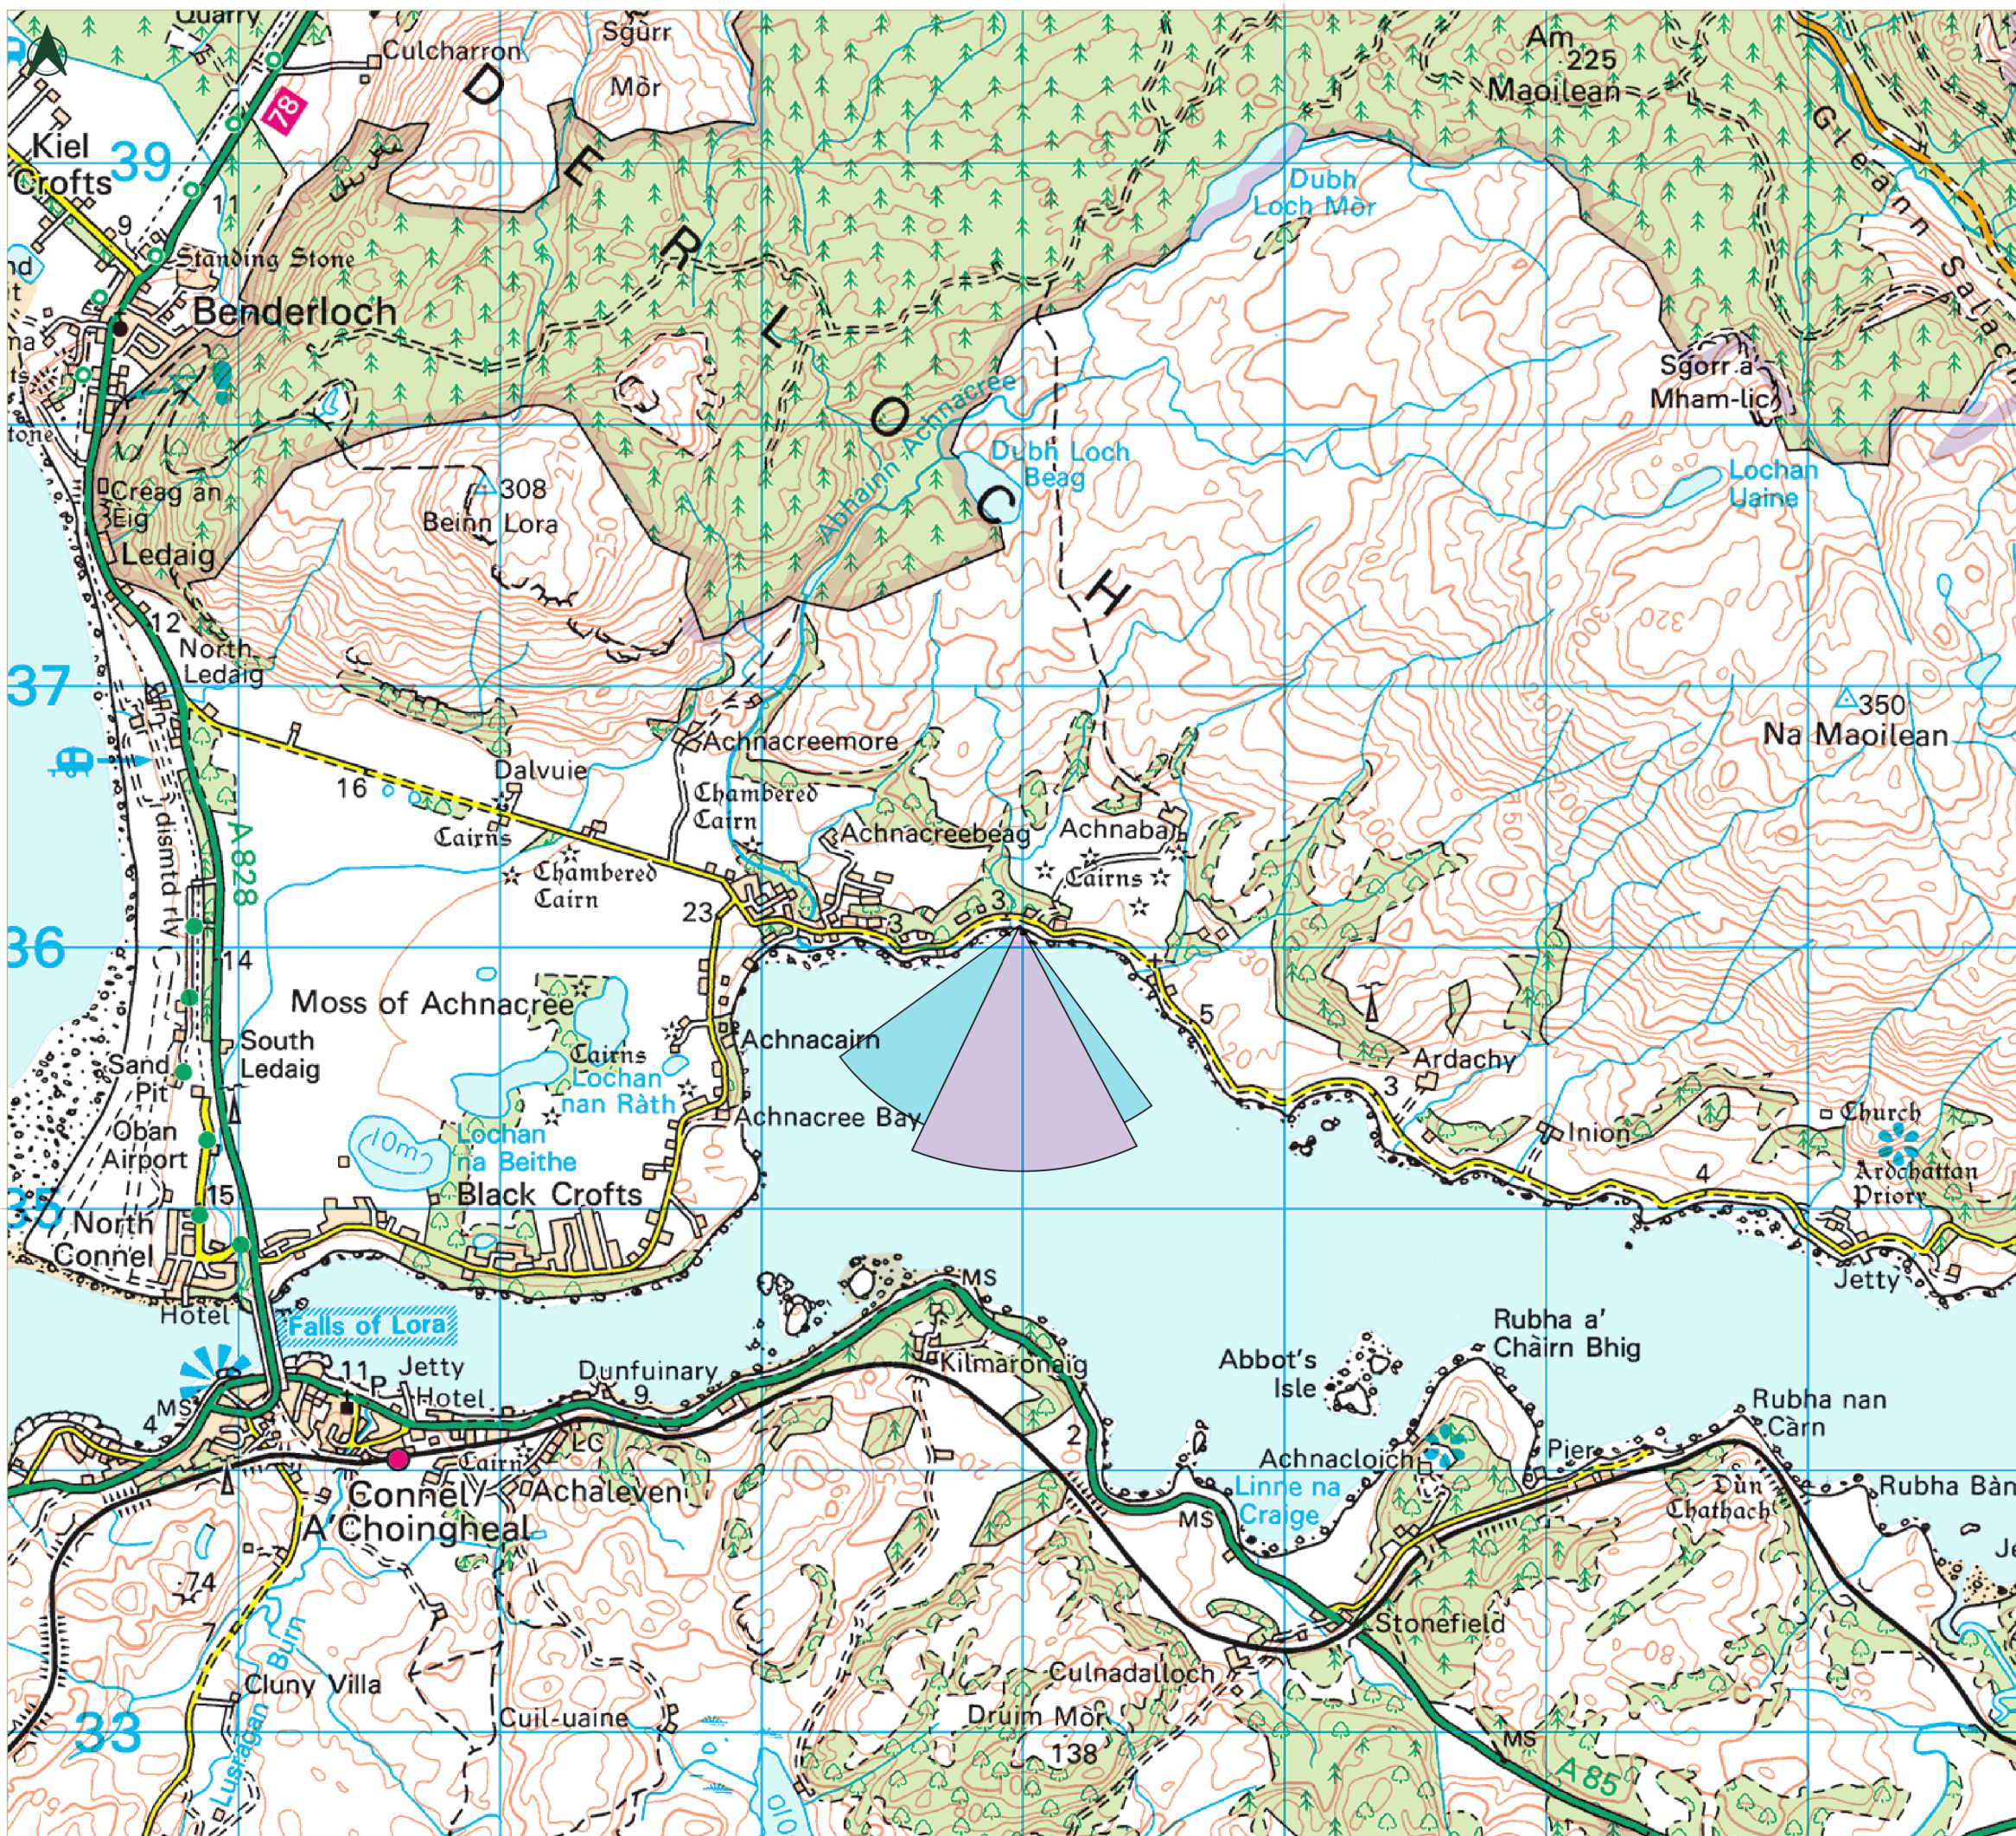

Cumulative

An Carr Dubh and Ladyfield Wind Farms would not be visible from this location.

-  90° baseline panorama and cumulative wireline
-  53.5° photomontage

Cruach Clenamacrie Wind Farm

**Night Viewpoint 6: Achnacree Bay
PHOTOMONTAGE VISUALISATION 6d**

Cruach Clenamacrie Wind Farm

Viewpoint 7
B845 Inveresragan

Existing View

The view towards the Site looks from the B845 across pasture divided by low stone walls. A belt of trees runs behind the fields and Loch Etive can be seen glimpsed through the trees. Tree covered hills rise on the opposite side of the loch in distinct layers. Within the wider view a property is visible on the B845 and in most directions the view is limited by trees and hills immediately adjacent to the road. Beinn Ghlas Wind Farm is visible on the skyline as a small feature on the distant hills. Once built, the blades of Blarghour Wind Farm will be visible behind the distant hills to the south-east.

Predicted Change

All six turbines would be openly visible on the hills beyond Loch Etive. It would be seen as a separate group of turbines to Beinn Ghlas and the turbines would appear notably larger in scale. At night all five of the proposed turbine lights would be visible.

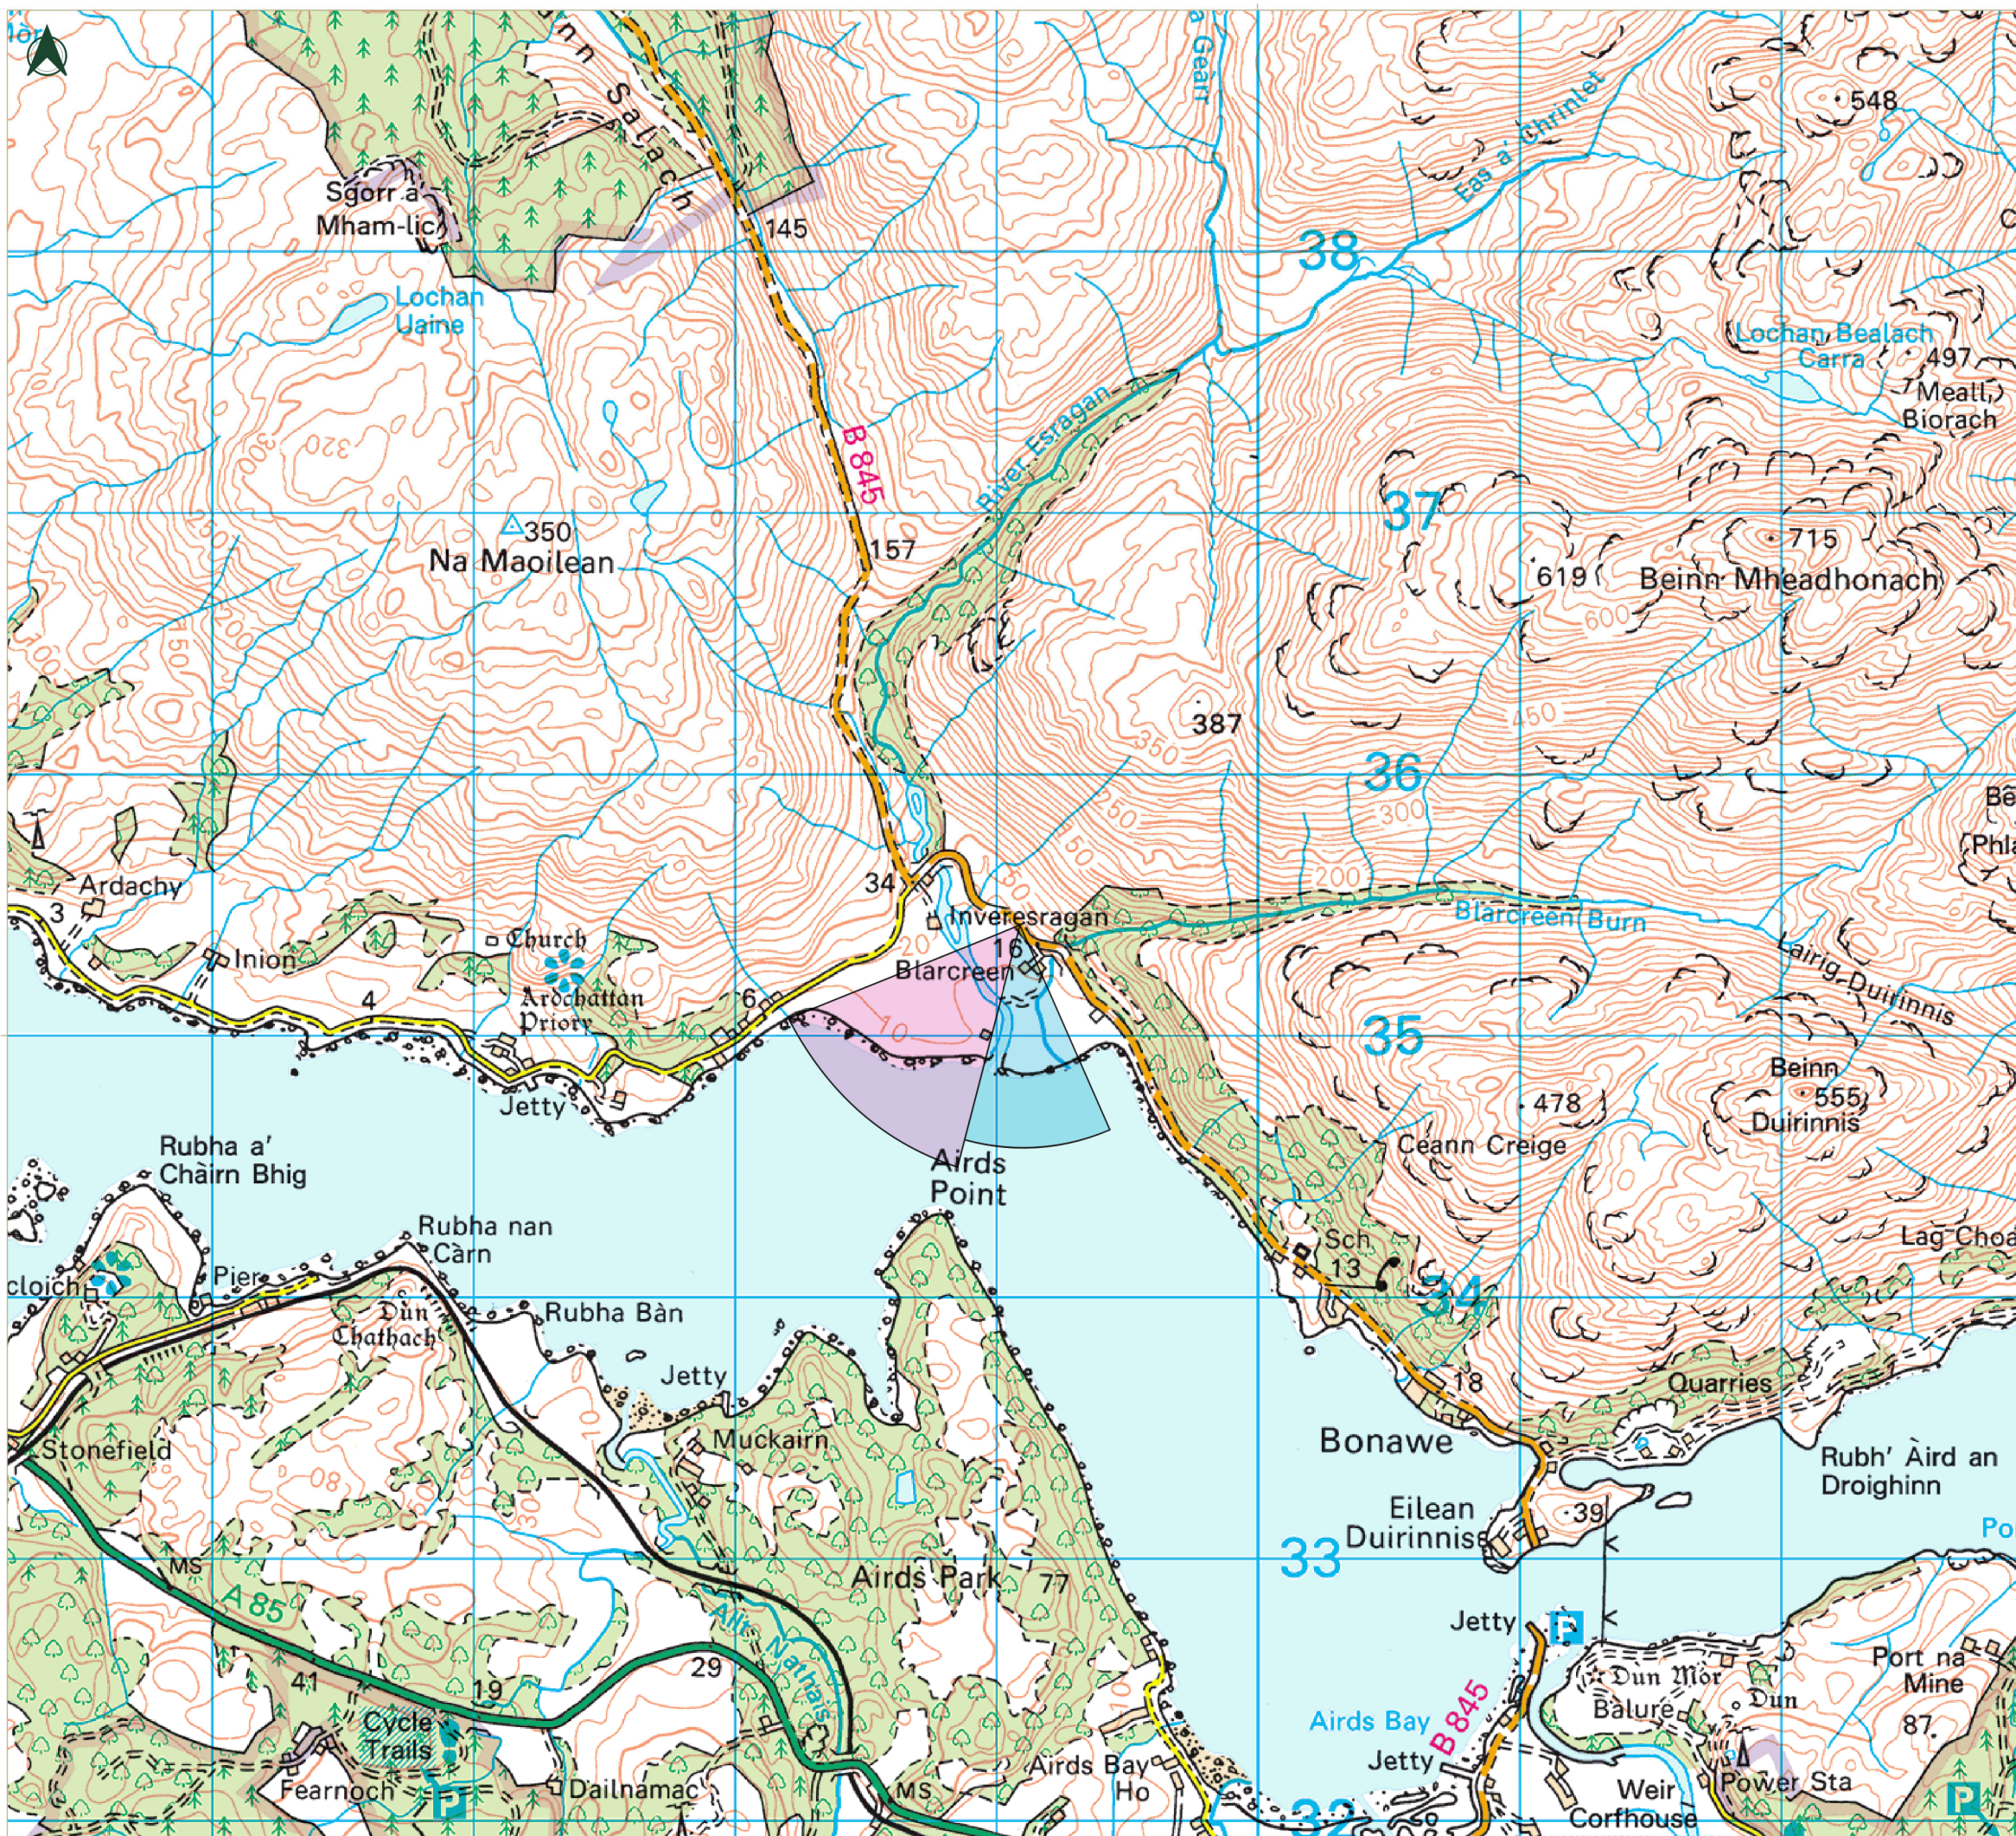

Cumulative

Ladyfield Wind Farm would not be visible from this location. There would be limited visibility of blade tips at An Carr Dubh Wind Farm seen behind Blarghour Wind Farm.

Cruach Clenamacrie Wind Farm

Viewpoint 8
Taynuilt

Existing View

This viewpoint is located at Taynuilt churchyard and in all directions the view is of the nearby village enclosed by hills at varying distances. The view towards the Site looks away from the church across the rooftops of nearby homes. Beinn Ghlas Wind Farm is visible as a small feature atop hills on the horizon to the south.

Predicted Change

All six turbines be visible behind above the hills and woodland to the west. Visibility would range from blades to sections of the towers. One turbine would appear noticeably taller/closer than the others. The turbines would appear as a separate scheme to Beinn Ghlas and would be larger in scale. At night all five of the proposed turbine lights would be visible.

Cumulative

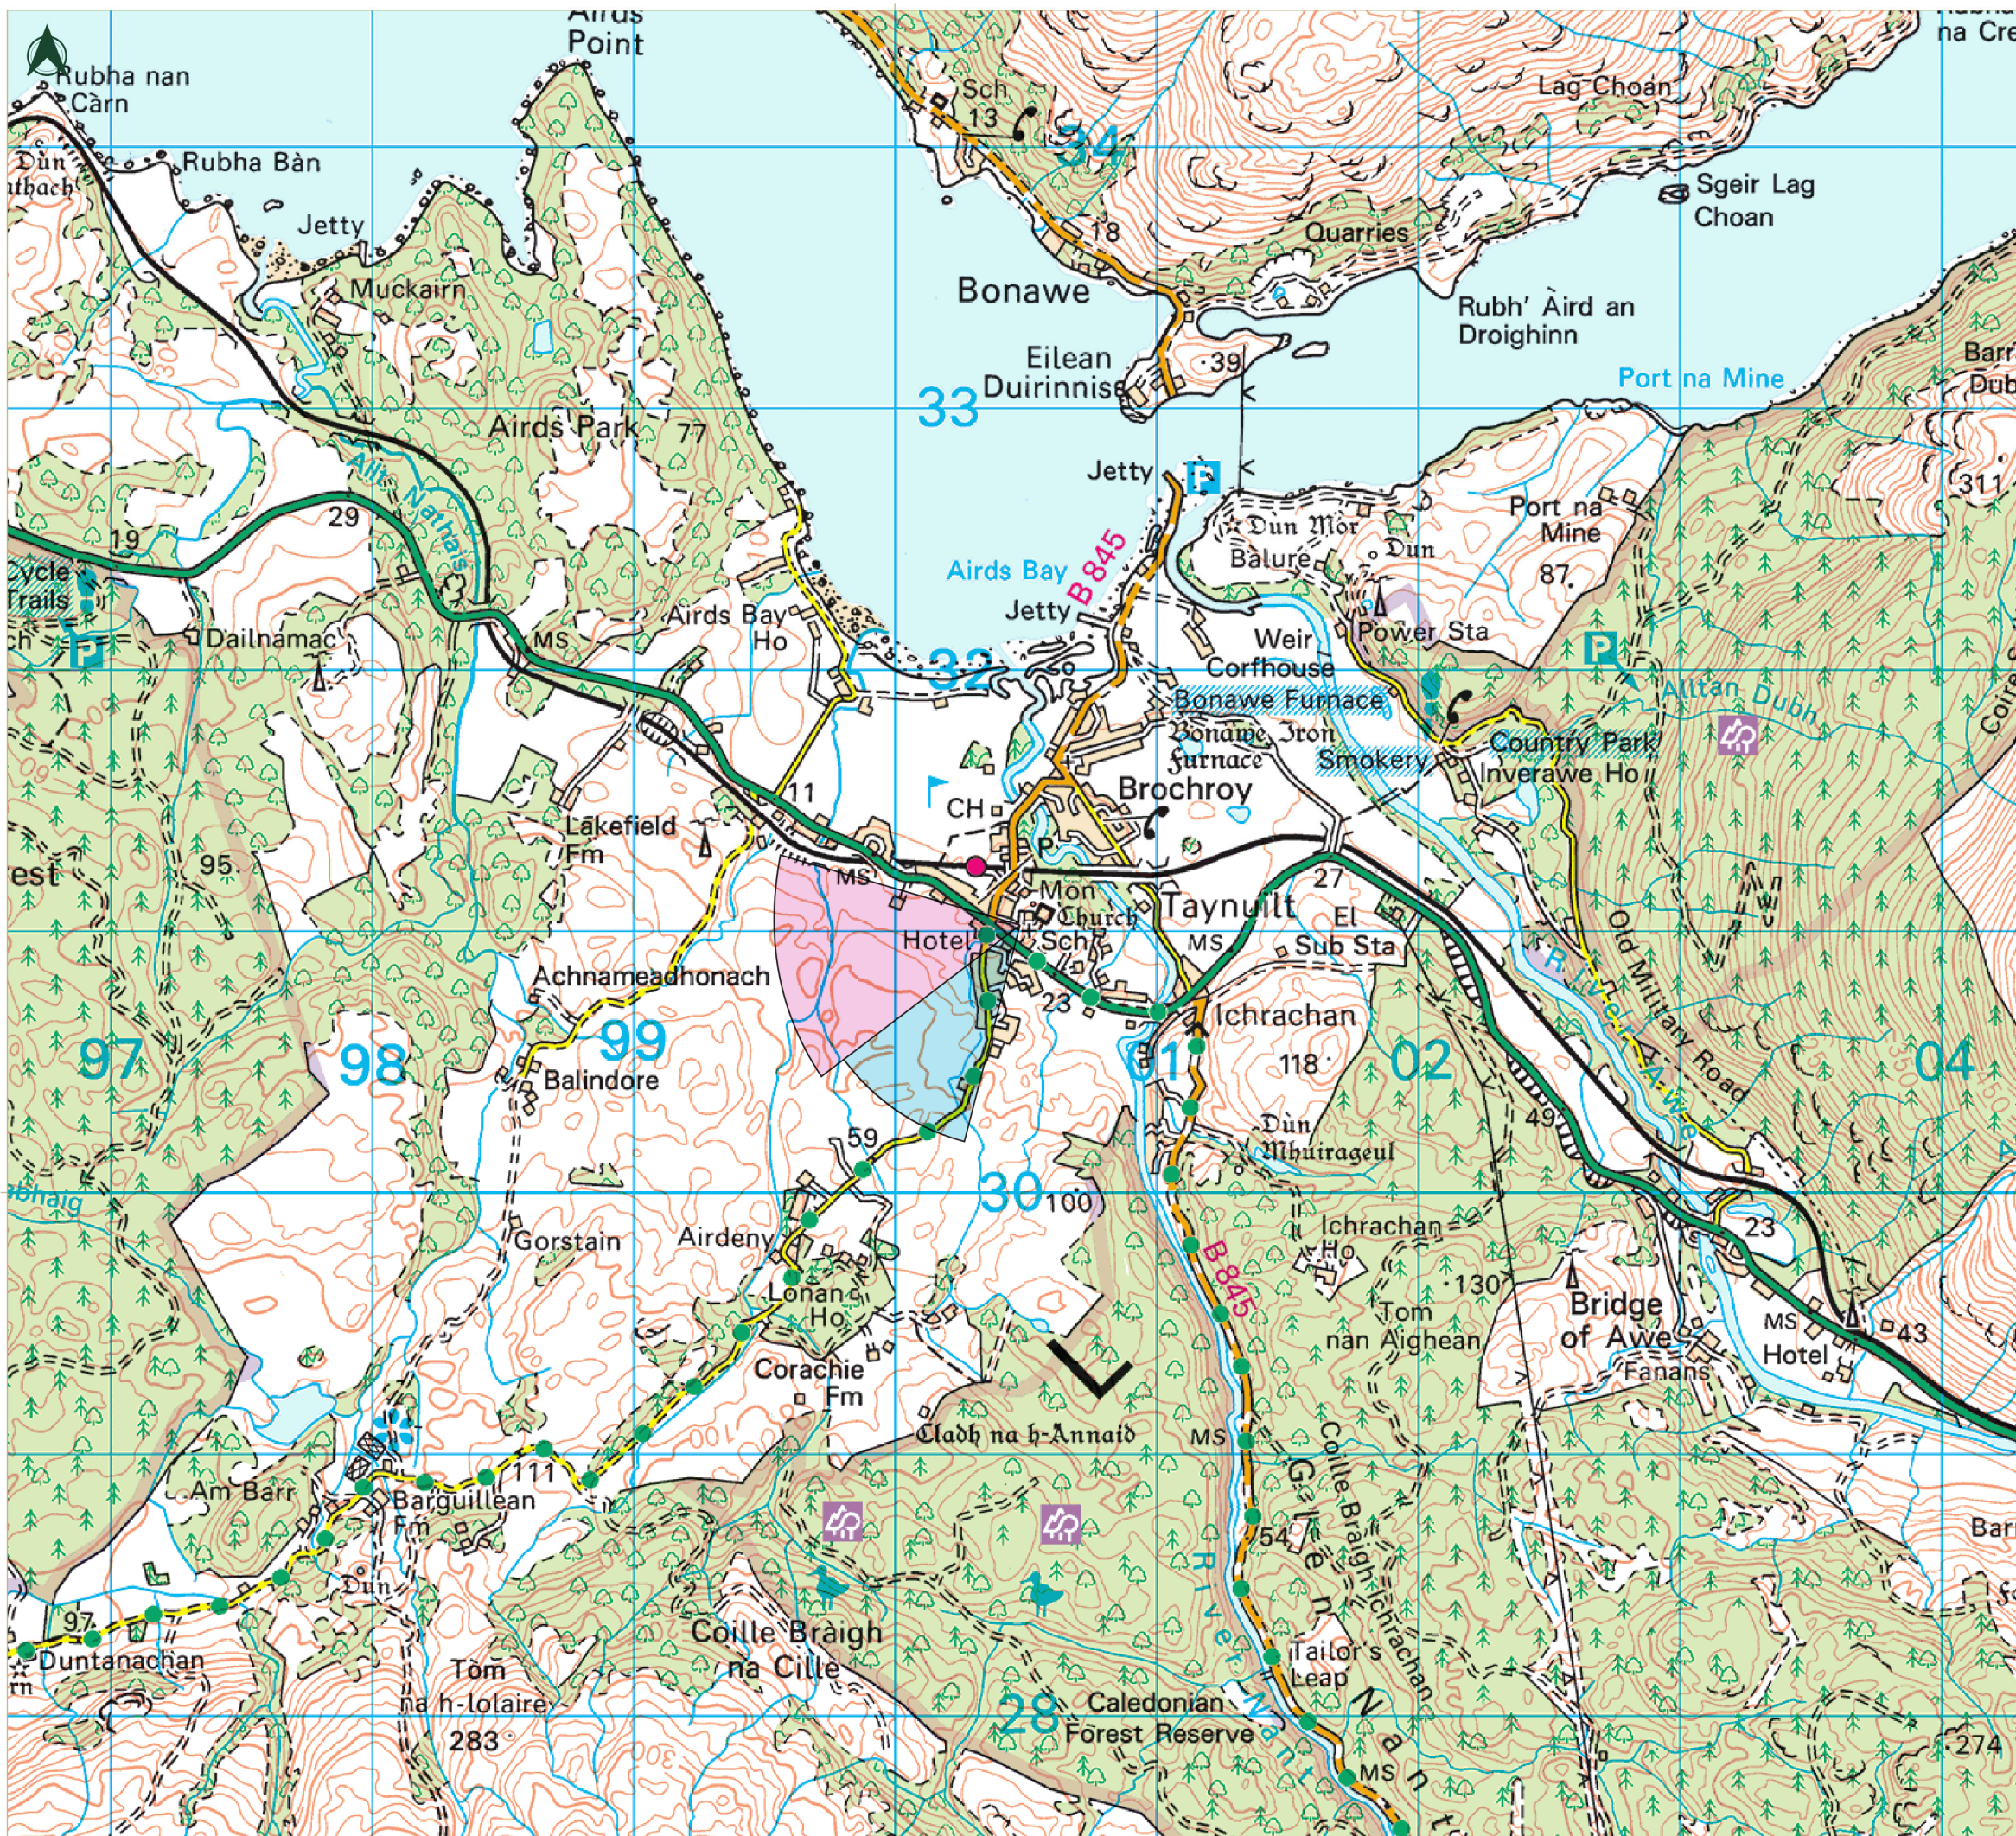

An Carr Dubh and Ladyfield Wind Farms would not be visible from this location.

PHOTOMONTAGE VISUALISATION 8d

Cruach Clenamachie Wind Farm

Viewpoint 9
Barran an Fhraoich Viewpoint

Existing View
This location is to the east of a mapped viewpoint on a hill to the east of Oban, it has a broad panoramic view that looks over a wide area of hills and lochs and west towards Mull. Settlements are visible in the glens and there is a mosaic of woodland across the hills. The two turbines at Barran Caltum Wind Farm are visible nearby and Carraig Gheal Wind Farm is visible on and behind the distant skyline. Ben Cruachan is visible beyond the nearby rolling hills looking towards the Site

Predicted Change
The proposed turbines would be visible on and behind hills in the midground of the view, seen partially in front of Ben Cruachan. Visibility would vary from blades and hubs to full visibility of the turbines. The turbines would have a similar apparent height in the view to those at Barran Caltum, but the larger blade diameter would be readily apparent. At night all five of the proposed turbine lights would be visible.

Cumulative
An Carr Dubh and Ladyfield Wind Farms would not be visible from this location.

Viewpoint 10
Loch Nell

Existing View

This view is located on a minor road at the southern end of Loch Nell. Towards the Site it looks along the loch towards rolling, wooded hills around the loch and a glimpsed view of more rugged hills behind. A house is visible on the edge of the loch near the viewpoint. To the south views looks across lower, undulating grassland, clusters of trees and woodland, a low overhead line crosses the view in this direction.

Predicted Change

The proposed turbines would be seen on, and descending behind, the hills at the end of the loch. Visibility of the turbines would vary with distance; the nearest turbines would be almost fully visible, and visibility of the most distant turbines would be limited to blade tips. At night three of the proposed turbine lights would be visible.

Cumulative

An Carr Dubh and Ladyfield Wind Farms would not be visible from this location.
