APPENDIX 6.2 ILLUSTRATIVE VIEWS

Appendix 6.2 Illustrative Views

Introduction

1. Illustrative views are referred to within Chapter 6 "*to demonstrate a particular effect or specific issues*" (GLVIA3 para. 6.19). These supplement the assessment, are not representative viewpoints and are not considered in detail in the viewpoint analysis (Table 6.6 of Chapter 6).
2. Visualisations in this appendix have been prepared using TrueViewVisuals on an iPad and show the turbines overlaid onto a photograph (taken on site with the iPad), or just a wireline. For overlaid images they are matched using existing features within the views as 'markers' and provide a reasonably accurate representation of the likely scale and position of the Proposed Development within the view, but do not meet the standard visualisation guidance. The approximate width of the view shown in each image is 65 degrees.
